**Educational & outreach activities
Opportunities for collaboration**

May 2013

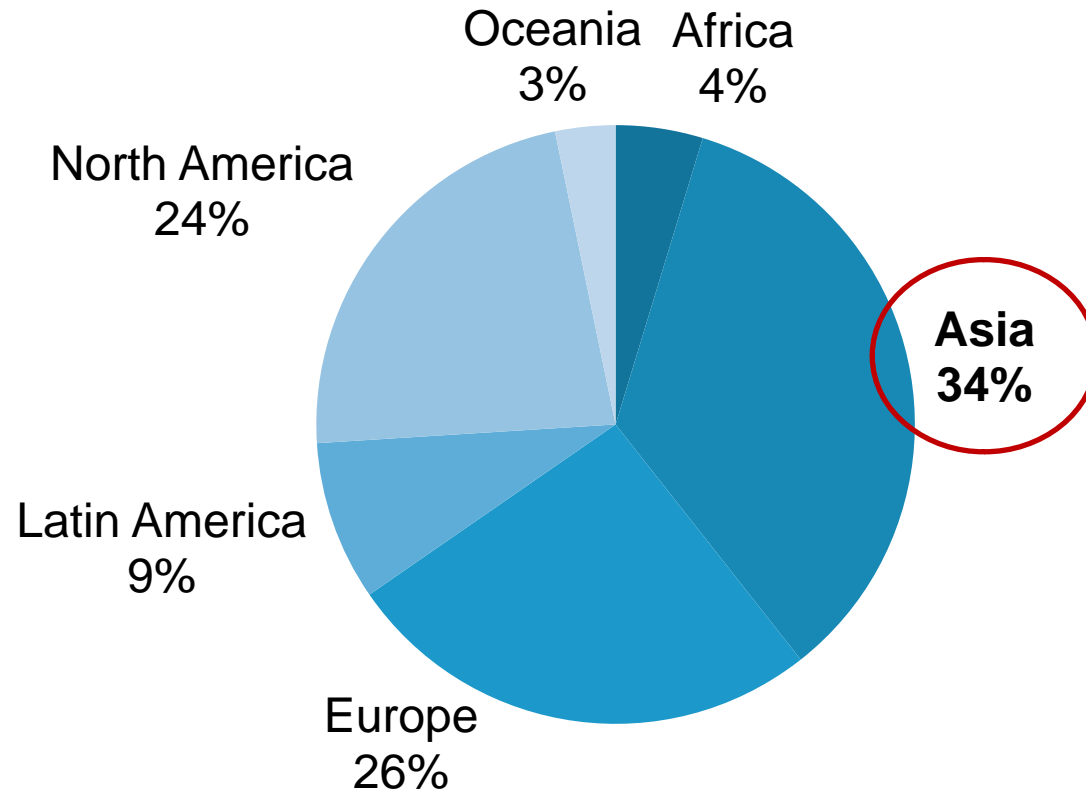

ISN

ISN Mission

**Advancing the prevention, diagnosis
and treatment of kidney diseases
in the *developing and developed*
world**

A Global Renal Community

Almost 10,000 members in 131 countries

Collaborations with 74 national and regional (affiliated) nephrology societies worldwide unite an additional ~20,000 nephrologists.

Kidney International

Combines basic & clinical science

- Latest advancements and original research in basic science and clinical medicine
- Content subject to rigorous peer-review
- Ahead-of-print articles online every week
- Translations into Japanese and Chinese

- 12 issues per year
- **Impact Factor 2011: 6.606**
- **Editor:** Detlef O. Schlondorff
- **Publishing Partner:** Nature Publishing Group

Japanese corresponding authors: submitted 8%, accepted 5% articles
Acceptance rate for Japanese authors the same as the average for KI

Nature Reviews Nephrol

Translates latest findings into clinical practice

- Online-only subscription for ISN members
- Authoritative and timely interpretations of key developments in nephrology
- For the busy practitioner to guide diagnosis and treatment decisions
 - editorial and opinion
 - highlights from the current literature
 - Commentaries & reviews
- 12 issues per year
- **Editor:** Susan Allison, PhD
Publishing Partner: Nature Publishing Group

ISN Education

New education strategy to integrate educational activities and make training more accessible to nephrologists in developed and developing countries.

Key Content:

- **'Ask the Expert'**
- **Case reports and presentations from ISN meetings**
- **Clinical practice guidelines**
- **Global Outreach Postings (free online publication of manuscripts of nephrologists from developing countries)**
- **Histopathology**
- **Key extracts from Kidney International**
- **Book chapters**
- **Interventional Nephrology**
- **And other features of interest to nephrologists from all regions of the world**

- **Translations**

ISN

ISN Global Outreach (GO)

Fellowships

Sister Renal Centers

Continuing Medical Education(CME)

Educational Ambassadors

Research & Prevention

95% of ISN's operating margin

*JSN generously supports GO awards at WCN
but, Japan has not been a host in any GO programs
no Japanese applications to be a host centre*

Current ISN Global Outreach activities

-  Emerging Centers 2012
-  Supporting Centers 2012
-  ISN CME Meetings 2012
-  2012 Fellows - Home Institutions
-  2012 Fellows - Host Institutions
-  Educational Ambassador Programme Host Institutions 2012

GO Goals: provide *appropriate* education & training
build *sustainable* capacity

Fellowship Training Program

Facilitates in-depth training in the developed world

- Provides nephrology training to physicians from emerging countries
- Key goal: improve the standards, knowledge and care in the Fellows' home countries upon their return
- Knowledge is acquired in basic and clinical nephrology, dialysis transplantation, and epidemiology
- ***Partnerships with other organisations & societies***

More than 500 young nephrologists from 80 countries have been trained as ISN Fellows since 1985

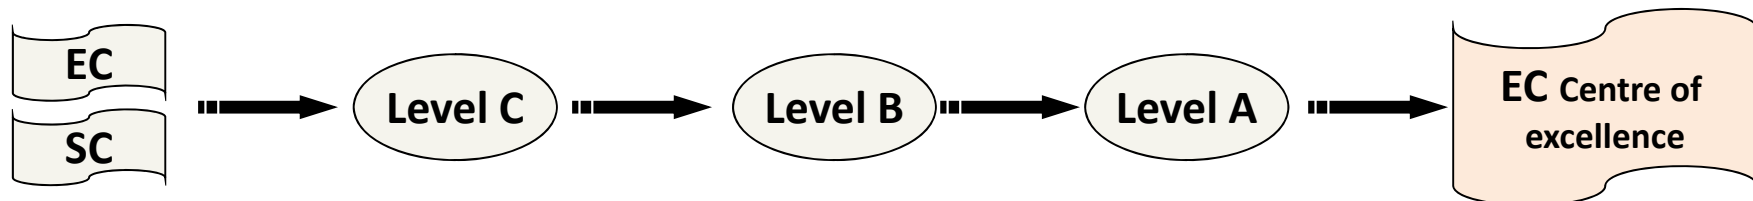

In 2012...60 ISN Fellowships

Sister Renal Center Program

Builds capacity through local centers of excellence

- Ultimate goal: the creation of local 'centers of excellence' to support and enhance nephrology within their geographical outreach
- An Emerging Centre is linked to a Supporting Centre and is guided through the program's 3 support levels
- The Sister Pair is supported through educational benefits and follow up
- New SRC Trio – allows graduating pairs to develop a combined supporting role for a new emerging center within the same region

In 2012...52 SRCs

Research and Prevention Program

Provides a global strategy for the prevention and regression of progressive renal diseases

- Establishes intervention and screening programs in emerging countries to:
 - Involve the active participation of local nephrologists and health authorities
 - Increase the overall level of care
- Runs the **KHDC** Program
 - Detection and Management of Chronic **K**idney disease, **H**ypertension, **D**iabetes and **C**ardiovascular disease
- Awards research grants to stimulate prevention programs

CME Program (Continuing Medical Education)

Delivers clinical, hands-on training

- ISN addresses clinical needs in emerging countries by organizing Continuing Medical Education (CME) courses and site visits
- Close collaboration between:
 - the program chair, the event organizers and the ISN GO regional sub-committees
- The CME program sponsors the attendance of expert nephrologists who share their knowledge

The CMEs educate approximately 15,000 physicians per year

50 CME events in 2012

Educational Ambassadors Program

Provides 'hands-on' training to centers in developing countries

- Centers in the developing world can request an expert to join them onsite
 - for specific training or
 - to initiate and develop community based research and screening programs
- ISN matches the request against a database of qualified and approved experts in the field of required training
- ISN supports the available Educational Ambassador to deliver high quality and relevant training for a period of 1 to 4 weeks

In 2012...10 EA visits

Japanese Society of Nephrology

<http://www.apsneph.org>

MISSION:

to promote the advancement, exchange and dissemination of scientific knowledge and research in all aspects of nephrology, and to promote the exchange and dissemination of this knowledge in the Asian-Pacific region

especially, to foster the development of high-quality nephrology in less well-developed countries of the region

LINKS:

**International Society of Nephrology (ISN) & ISN-GO
all national societies of nephrology within the Asian Pacific region

Journal

Nephrology - The Official Journal of the Asian Pacific Society of Nephrology

Editor-in-chief: *Peter Kerr*

Webinars of Significant Authors in Nephrology

Aim and Scope

Nephrology is published 12 times per year by the Asian Pacific Society of Nephrology. It has a special emphasis on the needs of Clinical Nephrologists and those in developing countries. The journal publishes reviews and papers of international interest describing original research concerned with clinical and experimental aspects of nephrology.

Awards & Grants

The ISN Global Outreach Fellowship Program

APSN has just entered a partnership with all
ISN-GO programs

50:50 split for grants in Asian Pacific region

Clinical Trials

THE AUSTRALASIAN KIDNEY TRIALS NETWORK

APSN to facilitate involvement of other countries in Asian Pacific region
